## 3. Compliance Information

This product is a motorcycle accessory designed and verified in accordance with the following requirements:

- Complies with the essential safety requirements of the EU General Product Safety Regulation (GPSR);
- Materials and structural design meet standards for impact resistance, corrosion resistance, and load-bearing strength;
- If it is a hydraulic or braking component (e.g., brake master cylinder, brake hose), it uses **DOT-certified fluid lines** and satisfies sealing integrity and pressure resistance requirements;
- The **CE marking** has been affixed to the product or its packaging where applicable.

**Note:** This is an aftermarket replacement or modification part. Some models are **not E-mark certified** and are **intended for off-road or closed-course use only. Do not use on public roads unless explicitly labeled as “E-marked.”**

## 4. Safety Warnings

- This product is **only compatible with specified motorcycle models**. Installation on non-compatible vehicles may cause improper fitment, functional failure, or safety hazards.

- Installation must be performed by a **qualified motorcycle technician**.
- A **torque wrench must be used** during installation.
- Inspect the part before every ride. **Discontinue use immediately if looseness, deformation, or cracks are detected.**
- This is a **non-OEM (aftermarket) part**. Its performance may differ from original equipment—please carefully assess your intended usage scenario.
- **Do not weld, drill, grind, or otherwise modify this product.**

## 5. Installation and Usage Instructions

### 5.1 Compatible Models

Please refer to the product detail page for the complete list of compatible models.

**✗ Not compatible with any other models. Forced installation may lead to accidents.**

### 5.2 Installation Steps

1. Park the motorcycle on a level surface and engage the main stand.
2. Use appropriate tools to remove the original OEM component.
3. Align the new part with the mounting holes and insert the included fasteners.
4. Tighten all bolts using a torque wrench to the specified torque value.

**Never tighten by hand feel!** Over-torquing can strip threads; under-torquing may cause the part to detach during riding.

1. After installation, manually apply pressure to test stability. Ensure there is **no unusual noise, play, or movement**.

### 5.3 Maintenance Recommendations

- Check fastener tightness every **500 kilometers or once per month**.
- Clean with **water or a neutral detergent**. **Avoid strong acids or alkalis**, which may cause corrosion.
- If used in off-road, muddy, or salt-spray environments, **increase inspection frequency**.

### 5.4 Disposal

At the end of its service life, dispose of this product as **metal waste** through local recycling or authorized waste collection facilities. **Do not discard improperly.**
